Hello!

I'm Jhestin, a Frontend Web Developer and UI/UX Designer passionate about designing intuitive interfaces.

With expertise in UI design and web development, I am dedicated to crafting intuitive interfaces that engage users effectively. Committed to continuous learning, I strive to enhance my skills daily, ensuring that every project exceeds expectations. Careful attention to detail is at the heart of my work, ensuring polished, user-centric designs that inspire engagement and satisfaction.

News Homepage

News Homepage

Built using Next.js, this project from frontendmentor.io is instrumental in honing my skills with React components and Next.js, enhancing my proficiency in frontend development.
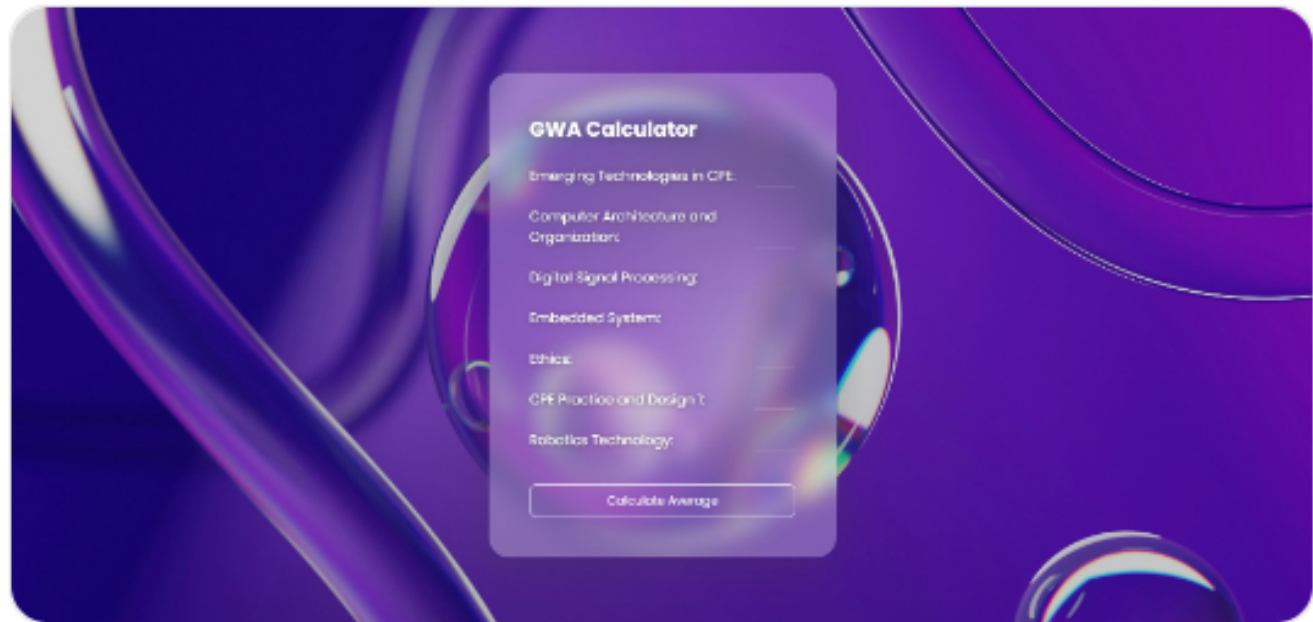

HTML CSS JavaScript React Next.js

GWA Calculator

Wanting to help my classmates struggling to compute their GWA, I made a web application that lets them calculate it easier.

Age Calculator

A web application from frontendmentor.io that calculates your age in years, months, and days. Built with HTML, CSS, and JavaScript, showcasing frontend development skills and interactive age calculation features.

HTML · CSS · JavaScript

WeatherSense

Designed using figma, I was tasked to create a UI Design for a mobile app that collects temperature and humidity data from a DHT11 sensor.

RDCHIME Inventory System

Served as a Lead UI/UX Designer, guiding the team in crafting the interface for RDCHIME's Inventory System.
